

MaxDRP™ PLUS RIPPER

ESCO Introduces a Hammerless DRP System for R-Series Rippers

Designed for safety and ease of use, the system utilizes a standard wrench on a unique pin and collar locking system, eliminating the need for swinging a hammer. No modifications to the ripper shank or nose are required to use this new system. In addition, ESCO alloys and point shapes provide up to 25% longer wear life for reduced maintenance costs.

KEY BENEFITS

- Easy installation and removal
- Reusable pin and collar saves money
- Slimmer profile, longer wear life
- No change to shank required
